Developed Google search books app, Lead Full Stack web,
https://google-books-search-myapp.herokuapp.com/
MERN-Stack App created with React components, works with helper/util functions, and utilizes React lifecycle methods to query and display books based on user search. Uses MongoDB so that users can save books to review or purchase later.
 - Tools used: Node.JS, Express, MongoDB, HTML5, CSS, Bootstrap, JavaScript, React.js, Google API.

Developed Miss-Translations, Lead Back-End, https://github.com/toomusa/Miss-Translations
Through a translation API and dictionary, I created an application that offers users funny mistranslations of their inputs.
 - Collaborating with a team of four, we created an application with a translation API that combined with a dictionary API, the app then manipulated the final translation of the user by changing the meaning of the initial phrase.
 - Supported with the integration and operation in JavaScript of the API's to send a response to the user.

Other Work Experience:

Lifetime Capital Financial Group, a financial advisory firm, Aug 2020 to Present, Part-time.
Administrative Assistant
- Instrumental in establishing CRM with Redtail, a web-based client relationship management tool to provide advisors anytime, anywhere access to their client data.
- Merged data from various sources into Redtail and scrubbed for accuracy. Created Redtail Templates to establish uniform "Note" entry and "Activity" Workflows.
- Maintain and update the Redtail database with daily activity. Perform other admin duties to include generating client account documents, changes, etc.

East Bay Restaurant Supply, Jan 2019 to July 2019.
